Good afternoon Gary,

In addition to the sampling EPA is considering, we suggest installation of additional groundwater monitoring wells in the Southern Impoundment area to evaluate the potential for migration of contaminants from this area. We requested for this evaluation via e-mail on March 21, 2014 (copy attached) and it appears that the monitoring wells have not yet been installed. Please let me know if you have any questions. Thanks.

Have a wonderful weekend!

Regards,

Satya
